Our vibrant full-day kindergarten program sets the tone for a wonderful school experience. Students learn to love school from the first day.

Our maker space is the place to invent, explore, inquire, and assess. Science, engineering, technology, and critical thinking come together here.

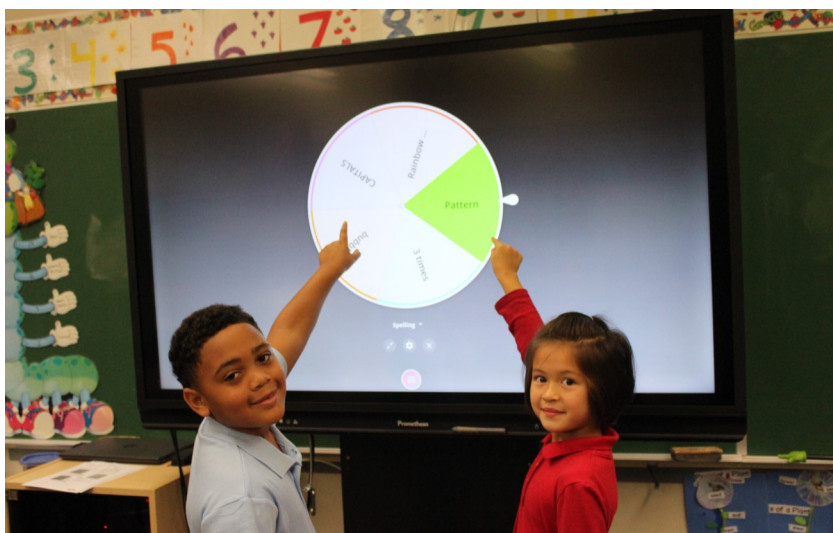

A variety of extracurricular activities, enrichment programs, career elective courses, and our buddy program all help to unify students across grade levels and provide experiences and interactions that extend beyond the classroom.

Students learn the value of service to others.  
Servant leaders are developed here.

Current classroom technology keeps students engaged in interactive learning.

Friendships bloom in our nurturing environment.

Students grow in faith, confidence and leadership by participating in our weekly school Masses and frequent prayer and Rosary services.

## The Future Begins Here

Envisioning · Engaging · Empowering
